Astronomer Certification for Apache Airflow 3 Fundamentals

Youssef Nakhli

Data & AI Engineer | Infrastructure Enthusiast | Building Data Pipelines (Real time & Batch) • Orchestration • Automation
Sfax, Tunisia

Summary

Data Engineering student at Faculté des Sciences de Sfax with strong expertise in Big Data technologies, distributed systems, and scalable data architectures. Experienced in designing and optimizing data pipelines, implementing ELK clusters for log monitoring, and building data-driven CRM solutions using Salesforce Data Cloud.

Hands-on experience with Hadoop ecosystems, data integration, data modeling, and real-time data processing. Passionate about transforming large-scale datasets into reliable, high-performance systems that drive analytics, AI applications, and business intelligence.

Committed to continuous learning and building production-ready data platforms that combine Big Data, cloud technologies, and AI innovation.

Experience

OliveSoft
Data Engineer
February 2026 - Present (8 months)
Sfax, Tunisia

• Implemented Data Streams using Salesforce Data Cloud to ingest and unify customer data.
• Leveraged Einstein Discovery to build a Unified Customer Profile (Customer 360 view).
• Designed and implemented customer segmentation strategies within Data Cloud.
• Developed an intelligent Loyalty Management program.
• Designed a data-driven loyalty program based on the Unified Customer Profile (points, tiers, rewards, personalized offers) to manage private sales and enhance customer engagement.

BIOMEDIQA GROUPE

AI Engineer

June 2025 - August 2025 (3 months)

Kairouan, Tunisia

• Developed a RAG (Retrieval-Augmented Generation) assistant to answer questions from internal documents (PDF and multiple file formats).

• Built a full-stack solution using FastAPI, React, LangChain, and a vector database.

• Integrated Ollama to run LLaMA models locally for secure LLM inference.

• Implemented multi-format document ingestion, real-time vector indexing, source citation, and user feedback tracking.

BIOMEDIQA GROUPE

Data Engineer

June 2024 - July 2024 (2 months)

As an intern at Biomediqa, I was responsible for designing, configuring, and optimizing an ELK (Elasticsearch, Logstash, and Kibana) cluster for monitoring tenant logs
