Mohamed Reguigui

Data Engineering Student
Sfax, Tunisia

Summary

Currently pursuing an Engineer's degree in Data Engineering at the Faculty of Sciences of Sfax.Feel free to explore my GitHub repositories for the projects I've been working on.

Experience

OliveSoft

Data Engineering Apprentice
June 2026 - Present (4 months)
Sfax, Tunisia

• Built and compared two streaming paths carrying the same on-premises Kafka event stream, one into Google Cloud and one into Azure Databricks, so the client could decide on measured latency, cost and recovery .
• Provisioned the Google Cloud infrastructure with Terraform and delivered the ingestion and transformation layers on Dataflow and BigQuery.
• Delivered the Azure route: private network access to the on-premises source, streaming into Delta Lake, and Azure Databricks declarative pipelines alongside Data Quality checks (Great Expectations).
• Benchmarked both routes under load, ran controlled recovery tests, and presented the results as the basis for the platform decision.

Avantages Soft

Full Stack Developer
June 2025 - August 2025 (3 months)
Sfax, Tunisia

Education

Faculté des Sciences de Sfax

Engineer's degree, Data engineering · (2023 - 2028)
