Principales compétences

Apache Airflow
Data Pipelines
Google Cloud Platform (GCP)

Certifications

Introduction to Data Engineering
Associate AI Engineer for Data Scientists
L'essentiel de Power BI
AI Engineer
SQL for Data Science

Mohamed Amine Dammak

Data Engineer
Gouvernorat Sfax, Tunisie

Résumé

I am a Data & AI Engineer with a strong interest in building scalable data and AI systems. My interests span Data Engineering, Big Data, AI Infrastructure, MLOps, and Generative AI, with a focus on designing reliable platforms that transform data into intelligent applications. I enjoy working on challenges involving distributed systems, workflow orchestration, data pipelines, cloud-native architectures, and machine learning infrastructure. I am particularly interested in the intersection of Data Engineering and Artificial Intelligence, where robust data platforms enable modern AI solutions.

Expérience

OliveSoft
8 mois

Data Engineer
juillet 2026 - Present (3 mois)
Gouvernorat Sfax, Tunisie

Data Engineer
février 2026 - juillet 2026 (6 mois)
Gouvernorat Sfax, Tunisie

- Designed the end-to-end architecture of a centralized workflow orchestration platform.
- Built reusable workflow orchestration components using Apache Airflow DAGs.
- Developed integrations with n8n, Talend, Azure Blob Storage, GCP, GitHub, SFTP, Power BI, and Cegid Y2.
- Implemented GitOps and CI/CD pipelines for workflow validation, versioning, and deployment.
- Deployed the platform using Docker on Azure Virtual Machines with monitoring through Datadog.
- Implemented authentication, RBAC, workflow monitoring, alerting, and metadata management.

- Automated enterprise ETL and workflow orchestration scenarios across multiple business systems.

Zetta-Spark
Data Engineer
juillet 2025 - août 2025 (2 mois)
Gouvernorat Sfax, Tunisie

Designed and deployed a secure multi-node NiFi cluster with Ansible, and implemented an ETL pipeline from MySQL to HDFS to enhance data ingestion efficiency

Zetta-Spark
Big Data Engineer
juillet 2024 - août 2024 (2 mois)

Migrated Big Data platform to Ubuntu 22.04 with Ansible automation.

DK Soft
AI & Data Engineer
février 2023 - juin 2023 (5 mois)

Social media analysis based on an Elasticsearch, Logstash, and Kibana cluster :
- Manual configuration of an Elasticsearch, Logstash, and Kibana (ELK) cluster.
- Automation of ELK cluster deployment and configuration using Ansible.
- Data collection from Twitter using snscrape for scraping tweets.
- Data cleaning and preprocessing of scraped tweets.
- Setting up pipelines in Logstash to ingest cleaned data into Elasticsearch.
- Indexing and storing the tweet data in Elasticsearch for efficient querying and analysis.
- Ensuring smooth data flow and integration between Logstash and Elasticsearch.
- Preparing and maintaining the infrastructure for BERT integration for sentiment analysis.
- Visualizing the results of the sentiment analysis in Kibana for data insights.

CliniSys
Business Intelligence Developer
juin 2022 - juillet 2022 (2 mois)
Gouvernorat Sfax, Tunisie

- Development of a decision-making solution for the analysis of IT equipment production

Formation

Faculté des Sciences de Sfax

Engineering degree, Data engineering · (septembre 2023 - mai 2026)

Institut Supérieur d'Informatique et de Multimédia de Sfax

Bachelor's degree, Computer Science , Big Data And Data Analysis · (2020 - 2023)

Lycée Mongi Slim

#Baccalauréat Sciences Expérimentales · (2020)
