PROFIL

Engineer who builds and integrates AI/ML solutions from LLM Agent pipelines to Predictive Models into full-stack Web and Mobile applications, turning real business workflows into automated, end-to-end systems. Ready to bring this expertise to your team as a PFE intern.

EXPERIENCE

AI Agentic Engineering Intern, TOCODEPRO

3 juil – 3 sept 2026

- Architected a 5 agent LLM pipeline (LangGraph, self-hosted Ollama, RAG/ChromaDB) automating global B2B lead prospecting-to-outreach for the CHR sector, replacing a multi-day manual workflow for marketing managers
- Engineered a secure Flask/PostgreSQL REST API (15+ endpoints, Dockerized) with a two-agent QA feedback loop and a production email system (SMTP, tracking, bounce/unsubscribe handling), built collaboratively via GitHub branch reviews
- Delivered a real time Angular dashboard enabling non-technical managers to configure, launch, and monitor the full pipeline autonomously.

Software Engineering Intern, OXYMEDPLUS

2 juil - 1 sept 2025

- Digitalized medical equipment and patient management (Django/PostgreSQL) for 50+ tracked devices, replacing manual, cross departmental tracking
- Built an integrated dashboard for one-click patient records and on-demand financial/logistics reporting (PDF/Excel)
- Automated patient return-date notifications, replacing manual staff follow up with proactive emails.

Full Stack Web and Mobile Developer (PFE Intern), TECHNOCODE

Jan - Jan 2024

- Built a real-time remote monitoring system for 60+ Zebra AIDC devices (Django, WebSockets, MongoDB), enabling live geolocation and early fault detection to cut equipment-loss costs
- Developed a companion Android app (Firebase) streaming field device data to the web dashboard for any Android-OS user
- Automated remote printer configuration via direct ZPL command scripting, eliminating manual on site setup.

PROJECTS

AI Resume Analyzer (Streamlit,NLP, MIT open source base, redesigned & enhanced) [Github]

- Built an AI powered platform (spaCy, pyresparser) to improve resumes via automated scoring, personalized skill/course recommendations, an admin dashboard (Plotly, MySQL), and a Groq API chatbot.

FreelanceHub (Spring Boot, Thymeleaf)

[Github]

- Built a secure job-matching marketplace connecting freelancers with relevant missions through skill-based matching, Delivered interactive dashboards (Chart.js) for real time tracking of missions and applications

EDUCATION

3rd Year Computer Engineering Student *Polytechnique Sousse, Tunisia*

2026

Bachelor's Degree in Software Engineering *ESSTHS, Tunisia*

2024

CERTIFICATIONS

- Azure AI Fundamentals (AI-900)
- Cisco Introduction to Data Science
- Cisco Python Essentials 1 and 2
- Microsoft Azure AI Essentials
- CyberSecurity Microsoft Certification
- Cisco Introduction to Modern AI

TECHNICAL SKILLS

Core: Django, Flask, Spring Boot, Angular

AI & Data: ML, NLP, LLMs, TensorFlow, Scikit-learn, Pandas

Mobile: Java, Kotlin

DevOps & Architecture: Docker, Jenkins, CI/CD, Git, Microservices (REST, GraphQL, gRPC, Kafka)

Databases & Cloud: PostgreSQL, MongoDB, MySQL

Also used: Flutter, Symfony, Node.js, Laravel, Supabase, SQLite

VIE ASSOCIATIVE

- **Chair, Computer Society IEEE EPS Student Branch**
- **Django Teaching** American Corner & IEEE EPS SB.

LANGUES

Français (B2), Anglais (B2), Allemand (A1.1)
