Professional Scrum Product Owner™ I (PSPO I)

Samar W.

Product Owner (PSPO I) | Delivery Manager | Retail de luxe, OMS, CRM & E-commerce

Tunisie

Résumé

"Fell into engineering by chance, embraced product ownership by choice." Certified Product Owner (PSPO I) & Delivery Manager with 3 years of experience in luxury retail, e-commerce, CRM and OMS— including missions for LVMH, Celine, Marc Jacobs and Soeur. I turn ambiguous business needs into shipped solutions: requirements gathering, functional specs, UAT, and go-live, end to end. Highlights: - Led a 6-person cross-functional team (AI, data, Power BI) to deliver forecasting models reaching 90% accuracy, supporting logistics and purchasing teams in order estimation- Designed and rolled out a hypercare process from scratch, reaching 90% incident resolution within 24h- Delivered a Salesforce Sales Cloud implementation end-to-end in 2 months- Coordinated OMS integration across 5 interconnected systems (ERP, POS, e-commerce, logistics, returns)- Led a CRM rollout compliant with China's PIPL law Tech-comfortable: Jira, Confluence, SQL, Python, Salesforce, Postman, Rest API, SOAP API, N8N, Talend.Fluent in French, English, Arabic. Based in Tunisia | Open to Product Owner / Delivery Manager roles — Tunisia, Europe, North America Walhasamar1@gmail.com

Expérience

OliveSoft

3 ans 8 mois

Product Owner & Delivery Manager

juillet 2023 - Present (3 ans 3 mois)

Сфакс

At OliveSoft, I work as a Product Owner / Delivery Manager consultant, staffed on different client missions in the luxury retail, e-commerce and CRM space (LVMH, Céline, Marc Jacobs, Soeur, MPBS, AtlasEnergies, KAMI). Each mission below reflects a distinct client engagement, from requirements gathering to production go-live.

AtlasEnergies - Service Delivery Manager
février 2026 - mai 2026 (4 mois)

Delivered a Salesforce Sales Cloud implementation end-to-end in 4 months, from scoping to production go-live, in close collaboration with business stakeholders.

- Facilitated scoping workshops to refine the business vision and identify stakeholder needs.
- Defined project scope and validated business requirements and MVP.
- Planned and executed a 3-month delivery roadmap: development, testing, data migration, dual run and go-live.
- Led UAT, go-live readiness, and successful production deployment.

Stack: Salesforce Sales Cloud, MVP scoping, UAT, data migration, go-live planning.

SOEUR - Product owner
septembre 2025 - février 2026 (6 mois)
Gouvernorat Sfax, Tunisie

Led the integration of OneStock OMS into SOEUR's retail ecosystem, coordinating end-to-end order flows and data synchronization across interconnected systems.

- Coordinated integration flows across 5 systems: OneStock, ERP, POS, e-commerce, logistics and returns.
- Defined and validated functional specifications and interfacing requirements.
- Designed and rolled out the hypercare process from scratch: built a shared tracking document used daily by business teams and store sales associates to centralize issue reporting.
- Drove daily triage and resolution cycles, reaching a 95% issue resolution rate within 24 hours.

Stack: OneStock OMS, ERP/POS integration, hypercare process design, cross-team coordination.

MPBS - Product Owner
août 2025 - décembre 2025 (5 mois)

Led a cross-functional team of 6 (AI, data and Power BI specialists) to build MPBS's sales and annual revenue forecasting dashboards, based on historical data and external factor integration.

- Managed a 6-person team spanning AI/ML, data engineering and Power BI reporting.
- Delivered prediction models reaching 90% forecast accuracy, directly supporting logistics and purchasing teams in estimating orders.
- Ran monthly on-site meetings at client factories to collect field feedback and continuously improve the solution.
- Collaborated with data, BI and business teams to translate needs into functional specifications and workflow documentation in Confluence.
- Coordinated integration, UAT and E2E testing to ensure smooth production releases.

Stack: AI/ML forecasting, Power BI, sales & revenue forecasting, Confluence, UAT/E2E testing.

End of Study internship

février 2023 - juin 2023 (5 mois)

Sfax, Tunisia

This project aims to automate the implementation of the project infrastructure: creation of the virtual machines hosted on Azure using Terrafom and github actions as a first step.

The second step is to maintain the virtual machines by implementing an efficient reboot strategy and ensuring the application of security patches promptly. This involved developing a custom job using Talend to streamline the reboot process, improving performance, and fortifying security.

CELINE

Proxy Product Owner

mai 2024 - mai 2025 (1 an 1 mois)

Joined CELINE HQ for one year as a Proxy Product Owner, contributing to the delivery of a clienteling mobile application for the Chinese market.

My role involved :

- Supporting the delivery of a clienteling mobile application for the Chinese market, built as a WeCom Mini Program fully adapted to the local digital ecosystem.
- Acted as a bridge between HQ and China teams, coordinating across frontend, backend, integration, and QA to align on requirements and ensure functional consistency.
- Documented the project end-to-end in Confluence, creating a solid reference base for architecture, business cases, and integration workflows.

- Collaborated closely with QA teams (France & China) to run E2E, integration, and UAT testing.
- Assisted the integration team as Scrum Master, supporting backlog refinement, sprint follow-up, and release coordination.
- Contributed to translating business needs into functional specifications and user stories, ensuring smooth communication between product and technical stakeholders.

LVMH
Junior Delivery Manager
juillet 2023 - mai 2024 (11 mois)

As a Junior delivery Manager within CoreHR project for LVMH Fashion group Division, I assisted through all the project phases from the design and specifications to the build phase to the run and monitoring. This multifunctional role is involving collaborating with cross functional teams and work closely with different third parties.

Missions:
- Design and Specifications:

▪ Understanding the core business (Human resources) , functional requirements and business aspects.
▪ Planning, animating design workshops to validate the specifications and the needed requirements with the Maisons and zones (APAC,Europe, Japan…).
▪ Enhancing the Confluence project space with detailed specifications pages.

- Data Flow Testing:

▪ Implementing a Testing strategy for Mulesoft data flows with Postman.
▪ Developing unit test cases to ensure proper functionality prior to delivery.
▪ Automating and executing Non-regression tests.
▪ Creating tests Dashboards.

- Release Management:

▪ Planning and scheduling meeting to display the prepared CutOver plan with concerned parties.
▪ Coordinating with development and operations teams to ensure alignment.
▪ Developing a comprehensive release management template outlining the steps for a seamless release.

▪ Managing versions of Jira releases and ensuring proper versioning practices.
▪ Keeping stakeholders informed about the release progress and changes.

- Hypercare and Monitoring

▪ Ensuring the daily monitoring and tracking of the interfaces through Datadog logs dashboards and daily checks reports sent to all the stakeholders.
▪ Providing dedicated support to quickly address users demands and troubleshoot problems.
▪ Managing and analyzing any incidents, bugs or change requests that arise post-implementation.

Functional stack: Human resources, SAP Success Factors.

Technical stack: Jira, Confluence, Datadog, Postman, MuleSoft Anypoint Platform, Dataweave, Mantis.

Spark-it
Internship Trainee
juillet 2022 - septembre 2022 (3 mois)
Sfax, Tunisia

-Using MSBI tools in particular SSIS (SQL server integrations services) to extract data from an SQL server database and ensure different transformation to align with the specified requirements of the project.
- Using PowerBI to create dashboards after identifying the functional and technical KPIs.
